

# Lightning

## Is your building at risk?

Lightning causes more than a billion dollars of damage to buildings in the U.S. every year.

## Are you at risk?

Architects, engineers, and builders may be liable for lightning damage if they fail to comply with [industry standards](#).

# Protection

## Protect your client and your reputation

Answer eight simple questions to determine whether your project requires a lightning protection system according to the nationally-accepted NFPA 780 Simplified Lightning Risk Assessment.

Now you can make the assessment online, quickly and confidently, at [www.ecl.ebiz/riskcalculator](http://www.ecl.ebiz/riskcalculator).

ECLE is the leading producer of architectural lightning protection components. We manufacture domestically and sell through lightning protection specialists certified by the Lightning Protection Institute.
