

Because lightning happens.

Air terminals are barely visible.
Cables are concealed.

Broadmoor Hotel's Cloud Camp, high above Colorado Springs, CO, is close to nature, including lightning's destructive force. Yet guests rest assured that the lodge has lightning protection. *J. Mark Nelson, Architect*

Protect your client and your work.

Lightning protection is reliable, affordable, and fits every architectural style.

But it only protects your buildings when you include it in the specifications.

To learn more, get your copy of ECLE's *Lightning Protection Guide* today, before something shocking happens.
